

## Worried about international scam calls and SMSes?

Activate the international call and SMS blocking features

These features are available **free of charge** by all telcos in Singapore, for all subscribers of mobile and residential fixed lines

### 1 Activating these features will **block all incoming calls and SMSes from international numbers to your telephone number**

- This is useful for those who do not expect calls or SMSes from international numbers.

\*Mobile calls and SMSes made from Singapore numbers (e.g. Singapore users roaming overseas and calling or texting home) will still be received as normal.

### 2

You can **disable the features while travelling and reactivate them when you return to Singapore**

- Check in with your telcos for the time required to effect the changes.

Reach out to your telcos to activate the features and safeguard yourself against scams!
